# PRESS RELEASE

SILIGENCE IS DELIVERING NEW ULTRA-FAST

INTERNET-BOX TO SWISSCOM

Siligence has in close collaboration with Swisscom and its hardware and software partners, developed the hardware for the new ultra high-speed internet-box with a full set of innovative features.

Paris, France , March 30th 2014

Siligence, a leading european manufacturer of internet access and video devices for the Digital Home, announced today that it is providing the new Internet-Box to Swisscom. This new broadband gateway is available to Swisscom residential customers for browsing the internet at a speed of 1 Gbps over Swisscom new fibre optical network.

SWISSCOM ultra high speed terminal is based on a dual processing platform integrating a Broadcom 63168 and a Marwell ARM9 chipset.

With its SFP optical WAN interface, the new Internet-Box allows up to 1 Gbps download speed and 100 Mbps upload speed. On LAN side it permits high speed

wireless connectivity within the home up to 1.3 Gbps thanks to Wi-Fi 802.11ac implementation. The new terminal also supports ADSL2, VDSL (with vectoring) and LTE (4 G).

Another key feature is its interactive display for simple and easy usage, for instance for the pairing of connected devices in the home (PC, Tablets, Video, Smart home….). The Internet Box also provides the end-user with an intuitive Web UI giving a direct view of the full home network layout. These elements meet Swisscom's target in terms of simplicity of use for its subscribers.

The Swisscom Internet-Box is also equipped with two USB connectors and a SD-card reader : this allows easy access to multimedia data, installation of a local NAS and easy file transfer to the Cloud.

Telephony has been also thoroughly defined as the Swisscom box is equipped with VOIP connectivity (2 FXS) and High definition embedded DECT that allows to connect up to 5 DECT Cat-iq 2 handsets.

"Our close collaboration with SILIGENCE gave us the possibility to focus on delivering a high quality, performant product which allows us to have short innovation cycles and be prepared for the future. We have also worked very closely with our customers in order to understand – and anticipate - their needs and integrate them in the development of the Swisscom Internet-Box. " said Mr. Andreas Martschitsch, Head of Home Network of Swisscom's Residential Business.

"Swisscom Internet-Box is one of the most innovative gateways in the industry" said Didier ZWIERSKI, CEO and President of Siligence. "Siligence is extremely proud to have been selected by Swisscom. We demonstrated our ability to deliver a highly innovative product in close partnership with our customer and with industry leaders such as Askey, SoftatHome, Vestiacom, Broadcom and Marvell".
